

Sealed Air Corporation

Conflict Minerals Policy

Sealed Air Corporation and its subsidiaries (“the Corporation”) are committed to conducting our business activities in a manner that meets the highest legal and ethical standards. Consistent with this commitment, the Corporation maintains a Responsible Chemistry Policy and seeks to source components and materials from companies that share our values regarding respect for human rights, ethics and environmental responsibility.

In an effort to address the violent conflict and associated humanitarian abuses related to the exploitation and trade of certain minerals originating in the Democratic Republic of the Congo and adjoining countries, in July 2010, Congress passed Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, under which companies must provide certain reports and disclosures related to the “conflict minerals” in their products. These conflict minerals include tin, tantalum, tungsten and gold.

In August 2012, the Securities and Exchange Commission (“SEC”) published final regulations to implement Section 1502, under which companies that file reports with the SEC must report annually on the conflict minerals that are included in the products they manufacture or contract to manufacture and for which the included conflict minerals are necessary to the functionality or production. As part of this reporting requirement, companies must take certain steps (i.e., a “reasonable country of origin inquiry”) to determine whether any of their necessary conflict minerals originated in the Democratic Republic of the Congo or an adjoining country (the “Covered Countries”) or from scrap or recycled sources and, if the minerals originated in a Covered Country and are not from scrap or recycled sources, to exercise due diligence on the source and chain of custody of those minerals.

The Corporation pursues supply chain transparency for conflict minerals and supports industry efforts to enable companies to source conflict-free minerals, and is committed to complying with Section 1502 and the SEC’s regulations thereunder. Accordingly, we expect our suppliers to fully support our compliance efforts, including in connection with conducting reasonable country of origin inquiries and, as appropriate, our exercise of due diligence on the source and chain of custody of our conflict minerals.

If you have any questions, comments or concerns about any of the foregoing, please reach out to us at contact.us@sealedair.com.
