Korrvu® Lok™

Compression Packaging

Performance Packaging with Impeccable Presentation

THE PRESENTATION YOUR PRODUCTS DESERVE. THE EXPERIENCE YOUR CUSTOMERS DEMAND.

Korrvu® Lok™ compression packaging is a patented solution for shipping products when presentation and customer experience are key. The unique design utilizes a low-slip film that positions and secures your products to a corrugated backing, which guarantees that your customers will enjoy a retail experience out of the box.

A Korrvu® Lok™ package reduces the threat of damage and theft in an easy-to-return or easy-to-recycle package. Custom printing options let you further enhance your brand image.

PERFECTLY OPTIMIZE YOUR PACKAGING

Each Korrvu® Lok™ solution is custom engineered to suit its intended product perfectly. This not only ensures optimal performance, but an extremely efficient package. Additionally, some of our most common E-Commerce application designs are available as standard offerings. Dimensional weight is reduced through the use of structurally reinforced lightweight materials, and elimination of excess packaging material.

DESIGNED TO MAXIMIZE VELOCITY AND EASE OF USE

Packaging with a Korrvu® Lok™ solution is fast and easy. The pop and lock design of the pack reduces operator error and increases fulfillment velocity. Korrvu® Lok™ packages are easy to open, as well as easy to re-use and recycle.

IDEAL INDUSTRIES

- E-Commerce & Omni-Channel Retail
- Cosmetics & Apparel
- Electronics
- Books & Media
- High-Value Luxury Brands
- Jewelry & Accessories

Traditional void fill is bulky and unsophisticated, resulting in larger cube dimensions.

Korrvu® Lok™ packaging offers a clean, stylish alternative that reduces the overall size of your shipping carton.
