

Water, Energy and Labour savings with CRYOVAC® Vacuum Rotary Chamber Systems

Less operators and increased shelf life for fresh foods

- The CRYOVAC® vacuum chamber rotary machines (VR) reduce labour, product handling, and improve overall efficiency of packaging lines.
- One fully automated machine can replace 2 or more manual or semi-manual packaging operations.

Water-free sealing saves

**93.000 Gallons /
350.000 Litres per year**
per machine

60% labour reduction

thanks to streamlined product flow

**25% energy savings
>40.000 kgCO₂e GHG**

per year, which is equivalent to 9 passenger
vehicles driven for one year
